

# HOMEOPATHY FOR TEETHING

## CHAMOMILLA

*The main remedy for teething.*

One red hot cheek and the other pale.

Pains make the baby demand things that are then thrown away

: contrary mood, hitting and kicking.

Better for rocking and carrying.

Fingers always in mouth.

## CALC PHOS

Slow and difficult teething with green diarrhoea or coughs and colds.

Useful for teeth that are too soft, decay easily and form cavities easily.

## PHYTOLACCA

Babies who want to bite on anything and everythin!

They bite their teeth or gums hard together.

Pains appear and disappear suddenly.

## BELLADONNA

Cheeks are red hot and swollen.

Pain is severe, possibly with a fever.

Restless and thrashing about.

Restless sleep.

Sudden onset.

## CALC CARB

Teething is slow and difficult.

Babies chew their gums especially during sleep as if they were grinding their teeth.

Accompanied by diarrhoea: undigested food and sour smell.

## SILICA

Very slow, painful teething.

Accompanied by smelly diarrhoea with flatulence.

Better for warmth (wrapping up head), worse for cold.

## Notes

- Use internally in 6C or 30C potency.
- Try 1 every 2 hours for up to 5 doses. If its not helping you probably haven't got the correct remedy!
- If it is helping tail off and give as needed.
- Always seek help from a qualified homeopath if you are unsure or none of the remedies you've tried are helping.
